

EMERGENCY RESPONSE & DISASTER RECOVERY SERVICES

A single call does it all.

A single call to PSC's spill line, 1-877-577-2669, toll-free in the United States, activates a response from the closest qualified response team. PSC's emergency response teams are equipped and ready to respond 24 hours a day, 365 days a year.

PSC's Emergency Response service provides containment, clean up, remediation, and disposal of material resulting from the inadvertent release of dangerous goods, hazardous materials, and wastes, or the spill of any material unusual in quantity or quality to the environment. With road, rail, air, and marine response capabilities, PSC operates the only continental emergency response system activated from a single number and operating from a standard operating procedure. This unified approach provides insurers and clients with a level of security and comfort unmatched by any regional or local responder.

A single call to 1.877.5 PSC Now activates a response from the closest available qualified response team anywhere in the US. Because PSC is an emergency provider and not just a "resource", calls to this number are answered by a live team member, not an operator or a "service." Our response time goal is less than two hours from activation; our average response time is 2 to 3 hours from activation; actual response time depends on the type and location of the spill, weather conditions, and time of day.

Disaster Recovering Services

PSC has successfully responded in the recovery of major natural disasters and man-made disasters across the U.S. PSC provides a wide variety of disaster services to our clients with remarkable insight and confidence regardless of the recovery project; by doing so, we have established a reputation for safety, quality and reliability. We pride ourselves on our strict adherence to safety and quality throughout the recovery process.

In addition to large scale debris removal, reduction and disposal operations, PSC offers services including, but not limited to, remediation and construction; emergency response; industrial cleaning services; environmental services; marine debris removal; hazardous waste handling; demolition and decommissioning; and mold and asbestos abatement.

Through the integrated services that PSC offers, we can incorporate regulatory reporting information, analytical services, long-term remediation, waste treatment/disposal capabilities, and a wide range of equipment suitable for spill clean-up operations in various terrain and vessel/packaging situations. By amending our emergency response assistance plan to include our clients' products and transit areas, we provide compliance with the Transportation of Dangerous Goods Act (TDGA) at a fraction of the cost of operating, training, and maintaining an emergency response unit of their own.

**ONE NUMBER.
ONE CALL.
TOTAL RESPONSE.
