UTILITY ENVIRONMENTAL MANAGEMENT PROGRAM

Visible Compliance, Managed Spend

With vast geographies, complex, potentially hazardous equipment and immense regulatory pressures, managing your utility service territory can be an overwhelming challenge.

Because you need nothing short of absolute confidence, it's critical to choose a firm that offers unmatched technical and regulatory expertise in environmental field service—PSC.

Look to PSC for—

A Fast, Far-Reaching Response: “Can you get there in time?” With PSC, the answer is an unqualified yes. Thanks to our nationwide scope and robust communications, we offer guaranteed arrivals across thousands of square miles with a:

- Network of highly trained professionals—always nearby
- Versatile fleet of emergency spill response assets
- Two-hour maximum response time— all day, every day

Thanks to our nationwide scope and robust communications, we offer guaranteed arrivals across thousands of square miles.

Comprehensive Incident Services: From a downed power pole to a hazmat accident involving residential property, PSC has the expertise, sophistication and broad capabilities to tackle any scenario completely and efficiently. We will:

- Contain and mitigate spills impact to surroundings
- Clean contaminated soil and other materials to mandated levels
- Clean manholes, vaults and other confined spaces for maintenance or repair work
- Classify, transport and dispose of waste

5151 San Felipe,
Suite 1600
Houston TX 77056

Full Environmental Compliance: Rest assured. PSC carefully documents, profiles and disposes of all hazardous and non-hazardous waste using our network of transfer stations and treatment, storage, and disposal facilities (TSDFs). We can then terminate the manifest quickly, relieving you of responsibility, while ensuring total compliance.

Technology. Accountability. Assurance: Distant, late-night or weekend jobs no longer mean a disconnect in terms of accountability; because PSC has the tools and technology to provide completely visible administration, 100% contract compliance—and prove we did everything right. We offer:

- On-line tracking and reporting with our Rhino™ field management system.
- Highly accurate electronic record-keeping, including photographic records of before and after spill site conditions.

- Customizable audit and inspection forms that fit your environmental program.

Documentation and Reporting: PSC can provide environmental inspection specialists to survey, inspect and correct deficiencies ensuring full environmental compliance. Our environmental management software and field tablet technologies allow our inspectors to instantly document their findings, schedule corrective actions, and generate task closure documentation to satisfy environmental reporting requirements.

Entrust Your Territory to PSC

Fast service across your entire area. Comprehensive clean-ups. Full environmental and contractual compliance. Zero headaches. PSC delivers it all.
