

Providing Tomorrow's Solutions Today.™

ON-SITE ENVIRONMENTAL MANAGEMENT PROGRAM

Keeping you environmentally compliant.

Integrated refinery and chemical facilities are among the most complex, dynamic and closely watched operations on the planet. They're also among the largest.

To attain full environmental compliance and confidence, you need a company with the commitment, workforce, technology and knowledge base that's just as big. You need PSC.

Look to PSC for—

Unmatched Plant Expertise: We work with some of the largest refinery operations in the country—sites covering hundreds of acres, employing thousands, and involving a multitude of bins and other assets. With our highly trained personnel and cutting-edge technology, you can count on us to do a safe, reliable job every time.

A Smart, Procedure-Driven Approach:

Using our deep industry knowledge, operational excellence, plus advanced mobile hardware and back-end systems, PSC can—

- Document, apply and repeat best-practice procedures to virtually eliminate Notices of Violation (NOVs)

- Deliver total on site visibility into the status and location of our bins, drums and other assets associated with your environmental program
- Ensure a more efficient, cost-effective workflow, less gear on site and more savings for you
- Provide electronic environmental documentation and reporting
- Slash time and overhead spent on environmental and compliance audits

PSC serves some of the largest integrated refinery and chemical companies in the nation.

Complete Asset Tracking: No matter how many bins, tanks and totes you have—or how widely dispersed, our revolutionary RhinoTrac™ field management system helps us manage them better. We can locate all of them instantly, service them quickly, ensure their integrity, and remove any no longer in use.

Full Environmental Compliance: PSC carefully documents, profiles and disposes all hazardous and non-hazardous waste using our network of transfer stations and treatment, storage and disposal facilities (TSDFs). We can then terminate the manifest quickly, relieving you of responsibility, and ensuring total compliance.

Documentation and Reporting: PSC can provide environmental inspection specialists to survey, inspect and correct deficiencies ensuring full environmental compliance. Our environmental management software and field tablet technologies allow our field inspectors to instantly document their findings, schedule corrective actions, and generate task closure documentation to satisfy environmental reporting requirements.

Turn to PSC—for a More Refined Approach to Environmental Compliance

Every day, you face extensive operational challenges, widespread responsibilities and ever-increasing environmental concerns. So choose a company with the commitment, capabilities and expertise to ease the burden—PSC.

Why PSC?
