

Providing Tomorrow's Solutions Today.™

TECHNICAL SERVICES

Your Chemicals, Your Research Campus, Your Confidence

The wide variety of chemical compounds found in research labs allow for miraculous discoveries. The diversity of today's research campuses requires a range of technical skills and experience to manage chemicals smoothly, safely and efficiently.

When it comes to chemical handling, waste disposal, managing compliance and more, PSC provides the technical field services you need in the way that meets both your budget and your standards of excellence in service —trust the experts at PSC.

Lab Pack

No matter how large or small your operation, or the quantity of chemicals you're using, PSC can provide lab pack services from our facilities throughout the US. PSC lab packing includes: inventory and onsite collection, segregation and packing, consolidation of like chemistry, reactives and cylinder management, transportation and treatment.

PSC offers:

- *Fast, same-day service*
—through CDL-carrying technician/drivers and a dedicated fleet of trucks
- *Professional performance*
—through experienced, fully-trained chemists, technicians, and program managers

- *Sustainable, environmentally responsible practices*
—for your budget, compliance and confidence

Service to your sites—

- **Pharmaceutical & Biotech**
- **Academic**
- **Hospitals and Healthcare Facilities**
- **Testing Laboratories**
- **R&D Operations**

Onsite Services

Need trained, lab- or environmental-based services but can't justify adding manpower? PSC supports many institutions with trained, fully certified personnel on a part-time or permanent basis. With our expertise and best-practice approach, we're your one-stop source for:

- *Waste handling, collection and auditing*
—Improve your collection efficiency through the use of knowledgeable PSC technicians beginning the segregation process from the first touch.
- *Site assessments and audits*
—Use PSC automation to perform your required SAA inspections, manage your waste pad, and capture where and what your researchers are discarding.

5151 San Felipe,
Suite 1600
Houston TX 77056

www.PSCNow.com

• *Lab moves, decontaminations, and special projects*

—When it's time to clean-up historical spills, clean-out a former researcher's space, or respond to preventative audit findings, PSC has the equipment and skill-set to respond.

MSDS Management

Using Software as a Service (SaaS) cloud-based technology, PSC offers a complete chemical management and inventory system for your entire network. PSC systems can maintain your MSDS catalog, control the ordering of new chemicals, and provide unparalleled visibility to protect your campus environment. In addition, intelligent text entry can search the detail of your inventory at the push of a button to ensure the regulatory compliance of your sites, in your state or across the country.

Discover What PSC Can Do for You

An industry leader for over 30 years, PSC has the experience, personnel and disposal facilities to bring you a complete, cost-effective, fully compliant chemical management solution tailored to your exact needs. See what a difference we can make at your site.

Why Choose PSC?

Safety

—*that sets the industry benchmark*

Single-Source Convenience

—*offering the full range of integrated services*

Unparalleled Service

—*through customer-oriented performance*

Highly Qualified People

—*including highly skilled and experienced technicians and chemists*

Sustainable EPA-Compliant Programs

—*to protect your reputation and protect the planet*
