

*Providing Tomorrow's Solutions Today.™*

REMEDIATION SERVICES OVERVIEW

## Helping You Succeed from the Ground Up

*If you're a real estate firm, utility company or any propertied enterprise, you deal with land issues that bring a host of complex environmental concerns impacting your liability, the success of your business, and your bottom line. So, to protect your interests and fully achieve your goals, make sure you partner with the best.*

### **Turn to the Experts at PSC**

Serving as a trusted advisor, contractor or both, PSC offers a level of experience, range of services, and nationwide reach unmatched anywhere. From environmental site assessments to manufactured gas plant remediations, mercury, and more, you can count on our staff of seasoned scientists and engineers to provide optimal results—no matter how challenging the project.

### **PSC offers these key remediation consulting services—and many more:**

- Environmental Site Assessments (ESAs) and Subsurface Investigations
- Manufactured Gas Plant (MGP) Site Investigation and Remediation

*"PSC's professional conduct and work practices inspire confidence. This puts our clients at ease when performing difficult tasks in high visibility situations."*

***We also provide—***

**Engineered Remediation Systems:**

In addition to remediation consulting, PSC can also design and construct more complex remediation systems and in-site treatment applications for your location/business. This can help you to tackle long-term challenges more economically.

**Environmental & Geotechnical Drilling:**

PSC owns and operates its own drilling equipment and full-service geotechnical laboratory.

**Underground Utility Locating Services:**

Buried pipes, lines, and other utilities can pose serious electrical hazards to personnel, and serious setbacks to any project. PSC has the expertise and equipment to locate, safely expose, and map your utilities.

***Discover the PSC Advantage***

We have some of the industry's finest, most seasoned engineers, scientists, and technicians. We can provide a full spectrum of services that are available across the nation, maximize your budget, and resolve all your environmental issues. You'll know you're on solid ground with PSC.
