

Providing Tomorrow's Solutions Today.™

RETAIL OVERVIEW

Serving Your Stores. Preserving Your Reputation.

Running a national retail operation is challenging. Understanding and meeting environmental compliance issues makes it tougher. Government regulators are cracking down like never before and green initiatives have come to the forefront, both in the boardroom and consumer living rooms.

You must be proactive to maximize your brand equity and optimize your operations. So insist on a single-source partner with the experience, dedication and end-to-end solutions to keep you out in front: PSC.

Setting You Up for Success

To give you the assurance that comes from total environmental compliance, PSC puts you on the right road. From day one, PSC will provide all your retail outlets with—

- Approved storage areas
- Clean-up supplies
- Full product hazard classification
- All necessary regulatory notifications

Keeping You Clean and Compliant, Day and Night

On call or as scheduled, PSC will then visit each of your nationwide outlets and—

- Remove waste from all containers
- Segregate materials into DOT class
- Manifest and transport to our nationwide network of treatment, storage and disposal facilities (TSDFs), saving you money and worries

You can be sure that we maximize the use of the most sustainable disposal technologies and minimize expensive, non-preferred incineration and landfill disposal options.

Providing Unparalleled Support

From your corporate office to the most far-flung retail location, you and every one of your store employees can count on PSC for unrivaled support—24/7, including:

- A dedicated account team
- A national service hotline for your employees
- On-line access to key compliance documents
- A 24-hour spill hotline

We also offer comprehensive online tracking and reporting across your whole network of stores, providing total visibility and ensuring complete confidence.
