

Providing Tomorrow's Solutions Today.™

RHINO OVERVIEW

PSC Rhino™—Reducing Work. Trampling Costs. Creating Higher Standards.

*How do you know when cleaning is done fully, to your satisfaction?
How do you monitor project costs against purchase orders, and performance against contracts?
How can you save money on routine procedures, year after year, knowing upfront what you'll be spending?*

The answer is PSC Rhino.™

What is PSC Rhino™?

A groundbreaking electronic field management system, PSC Rhino™ fuses cutting-edge hardware, a robust job tracking system and Web-deployed data to give PSC and you unprecedented real-time visibility into all your hydroblasting, vacuum, tank and other industrial cleaning projects. The result is—

- Lower maintenance and turnaround costs through reduced work and headcount
- Greater assurance, letting you approve the job (and amount due) before you get the bill
- Improved contract adherence and administration, reducing dependence on invoice audits
- Safer, more reliable and cost-effective work

RhinoPad™

At the tip of the PSC Rhino pyramid is RhinoPad™. It's a powerful, intrinsically safe handheld device that lets our field personnel work smarter and safer, clean better and more economically, while keeping you fully informed with job progress and adherence to purchase orders and contracts.

RhinoPad™ highlights:

- Captures real-time project data
- Gives PSC field personnel instant access to contracts, purchase orders, procedures and more
- Interfaces with RhinoScope™ borescope to validate cleaning success
- Feeds the PSC enterprise database and your customer Web portal

5151 San Felipe,
Suite 1600
Houston TX 77056

www.PSCNow.com

**How you benefit:**

- Ensures the best cleaning results through electronic job procedures
- Enforces safer working conditions through onsite JSAs
- Eliminates costly missteps by keeping PSC more accountable to contracts and purchase orders
- Lets you decide “how clean is clean?” by interfacing with RhinoScope™
- Reduces billing errors through electronic shift tickets you approve—in the field or at your desk
- Speeds completion by ensuring crews have the equipment and materials to finish the job
- Helps PSC serve you better through continuous process improvement and cost reductions

RhinoPro™

Available to our field personnel at the point of service through RhinoPad™, and to you from your PC, RhinoPro™ is the innovative software application that underpins the entire Rhino solution. It provides precise contract management, purchase order tracking and electronic shift ticket approval—and crushes costs by cutting out inefficiencies and unnecessary work.

RhinoPro™ highlights:

- Ensures safe, effective practices by providing job site procedures for each piece of equipment
- Generates legible and 100% accurate electronic shift tickets onsite
- Provides real-time information compared against the purchase order—as work is performed
- Standardizes procedures and naming, so costs can be reviewed and compared over time
- Lets PSC update job procedures to reflect up-to-the-minute improvements

How you benefit:

- Improved adherence to established contracts
- Lets you track ongoing project costs in real time

RhinoTrac™

A combination of GPS and sensor technology telemetry, asset management systems and advanced software, RhinoTrac™ gives PSC total onsite visibility into the status and location of our technicians, vehicles and equipment. That equals a more efficient, cost-effective workflow, less gear on site and more savings for you.

RhinoTrac™ highlights:

- GPS telemetry shows current location and route tracking
- Indicates status of trucks, technicians and cleaning equipment
- Onboard sensors measure PSC equipment performance
- RFID Asset Management System pinpoints all bins, tanks and totes

How you benefit:

- Reduced costs due to—
 - Route and equipment optimization
 - Less materiel and manpower onsite
 - Elimination of non-utilized rented assets
- Improved communication, asset coordination and environmental compliance
- Real-time management of productivity and delay minimization

Put the Power of PSC Rhino™ to Work for You

A complex, state-of-the-art system with one simple goal — saving you money by reducing work, raising standards and eliminating inefficiency. See what PSC Rhino™ can do for your business.

RhinoScope™

RhinoScope™ is PSC's exclusive, cutting-edge hardware that gives us a never-before-seen "inside look" at the actual work being done, while keeping you updated on job progress and performance against your purchase order—all in real time!

RhinoScope™ highlights:

- Lighted camera mechanism with 35' lead
- Captures pre-cleaning images to establish the best method
- Post-operation inspections validate job quality
- Tracks and feeds job progress to your PC or our RhinoPad™ handheld

How you benefit:

- Ensures cleaning is done right the first time—virtually eliminating reworks
- Lets you track actual job progress visually and remotely—right from your desk
- Reduces costs by establishing most efficient, best-practices job procedures
- Superior results help maximize heat transfer

RhinoVision™

RhinoVision™ is how we put all the benefits of PSC Rhino™ right at your fingertips—through a secure, easy-to-use Web portal you can access most anywhere. It puts you in control of the work—and costs.

RhinoVision™ highlights:

- Shift tickets, job logs and JSAs
- Comprehensive job progress reports
- RhinoScope™ inspection photos
- Customizable real-time cost tracking and status reports
- Plus much more

How you benefit:

- Save travel time by monitoring operational job progress offsite—no matter where
- Broaden your reach by managing projects across multiple locations—throughout the region or country
- Get complete visibility of asset status
- Improve compliance reporting

Rhino™ is ideal for these industries:

- Refining and Petrochemical Operations
- Utilities and Power Plants
- Steel and Paper Mills
